

I oppose HR 4026.

A friend of mine had told me about this bill and I thought he was joking. But then I should have realized that we would have a group that would oppose a new and great technology. I love the XM radio and I think that the new traffic and weather is about time. I'm sick of trying to listen to a 30 second traffic report every 10 mins on a hard to get AM station. So instead of competing with the technology, they get you guys to stop if for some stupid reason. Does that mean that the Oven industry can get you guys to outlaw Microwave ovens. Give me a break. Don't make this an issue.

Sincerely,

David Seidman
